

NEXEO | HDX™

ONE PLATFORM, THREE SOLUTIONS.

We are excited to announce that the NEXEO communication platform is now available in three product tiers, each uniquely created to address a specific market demand.

NEXEO's flexibility enables us to deliver three solutions with one platform, making NEXEO the first ever configurable headset system ideal for any type of restaurant, regardless of size or layout.

NEXEO is truly the total solution for restaurant communication that grows with our customers and makes it easy to upgrade as customer needs evolve.

NEXEO® | Core

Enables a modern implementation of the classic drive-thru experience with second-generation wideband HD audio to further improve sound quality for both employees and customers, as well as ease-of-use enhancements to improve the day-to-day crew experience.

Includes:

- Second-generation wideband HD audio
- Touchscreen interface
- Improved message center
- Simplified headset pairing
- At-a-glance system health diagnostics
- HME CLOUD® connectivity
 - System updates
 - Settings and controls consistency
 - Device support

NEXEO®

The total solution for restaurant communication, NEXEO provides a comprehensive communications platform for drive-thru and beyond that helps engage employees in key areas within their operation, while delivering the most critical information to the right person at the right time.

Includes all features of NEXEO Core, plus:

- Enhanced crew communication
 - Crew profiles
 - Crew communication
 - 1:1 communication
- Hands-free voice commands
- Integrated ZOOM Nitro® alerts
- Support for larger store formats
 - Expanded range and coverage
 - Expanded safety options

NEXEO® | Pro

Offers the greatest operational efficiency on the market by enabling seamless third-party integrations, including the latest voice AI technology and other store systems to provide crews with real-time actionable alerts when it matters most. Frees up staff to focus on other key areas of the restaurant while a third-party voice AI provider automatically takes customers' orders and sends them to the POS to process.

Includes all features of NEXEO Core and NEXEO, plus:

- VAIO-ready platform uniquely designed to provide the best bot audio experience
- Seamless integration with third-party store systems to provide actionable alerts in real time
